

**MAXAVA**  
MAXIMUM AVAILABILITY

HIGH AVAILABILITY SUITE

# When it comes to your data, one life is never enough

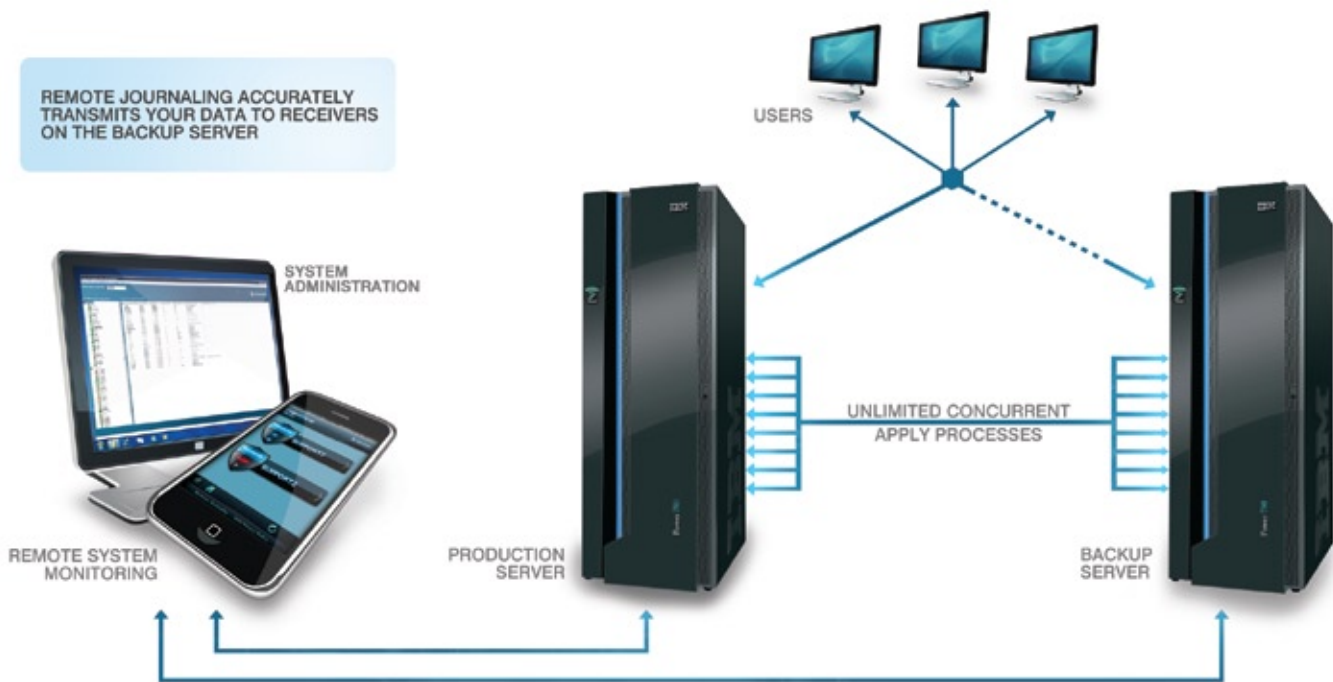

Maxava produces the world's premier business continuity and replication products for IBM i. Our performance levels have been proven in the toughest environments for the most demanding clients.

Maxava supports a global client base directly and via a network of strategic alliances and partnerships. Maxava is dedicated to IBM i, and focused on delivering the highest service levels to IBM i customers across all major industries.

# Maxava HA - Enterprise level disaster recovery for IBM i

Maxava offers High Availability software that uses the full native functionality of the IBM i operating system. Maxava HA Suite provides real-time replication, unlimited concurrent apply processes, constant data checking and an easy to use GUI and mobile monitoring system.

Whether you operate a Fortune 500 enterprise or a small business, whether you are ensuring business continuity for packaged or home-developed IBM i applications, Maxava has a solution for you. Cost effective and scalable, the Maxava HA Suite provides the highest levels of usability, performance and readiness.

## Simple to Use

- Intuitive GUI and green screen facilitates daily management in minutes
- Remote or on site installation saves time and costs
- Mobile device support allows you to monitor your HA Solution from anywhere

## High Performance Replication

- Uses 100% native IBM i Remote Journaling for highly efficient replication that reduces the load on the production server
- Unlimited concurrent apply processes easily process high transaction volumes and minimize replication latency

## Always Role Swap Ready

- Easily see the replication synchronization status via the GUI or green screen interfaces
- Constant data checking ensures data integrity
- Self-healing technology detects and fixes issues automatically

## Some of our customers

Bendon  
 Revlon  
 Walkers Shortbread  
 Brother  
 IOR – The Vatican Bank

Bentley Motors  
 Playboy  
 Government of Gibraltar  
 Murco Petroleum  
 Nintendo of Europe

ND Logistics  
 CSCS  
 KSB Hospital  
 Rubbermaid  
 Edexcel

# MAXAVA HIGH AVAILABILITY SUITE

## Maxava HA™ ENTERPRISE

Maxava HA Enterprise delivers the most comprehensive high availability and disaster recovery readiness for an IBM i application. Enterprise includes all the functionality of the SMB version with enhanced replication and monitoring tools necessary for more complex environments.

## Maxava HA™ SMB

Maxava HA SMB provides cost effective High Availability to protect your IBM i business critical applications and data. It incorporates advanced autonomies, and offers enhanced auditing and user administration tools.

## Maxava HA™ DATA STREAM

Maxava HA Data Stream is a highly efficient data replication solution that ensures business critical data is backed up in real time and fully recoverable.

## maxView™

maxView delivers a smart and easy way to monitor your Maxava HA environment and allows you to easily check relevant IBM i system resources from any web ready device.

“

For the police it's handcuffs, a nightstick and firearm. For disaster recovery we use Maxava.”

Sgt. Hank Lindgren  
Guilford Police Department

## KEY FEATURES

All of the products in the Maxava HA Suite integrate seamlessly and quickly with your existing technology.

Maxava HA Product Features	DATA STREAM	SMB	ENTERPRISE
Data replication	*	*	*
Object replication (Over 40 different types)		*	*
DTAARA / DTAQ	*	*	*
User profile replication		*	*
Spool file replication		*	*
Dynamic database management		*	*
Library replication		*	*
Save-while-active		*	*
Block level data audit		*	*
Block level data refresh		*	*
IFS replication			*
MQ Series replication			*
maxView Monitor			*
Concurrent apply processes	UNLIMITED	UNLIMITED	UNLIMITED
Select / Omit		*	*
Library redirection	*	*	*
Role swap / Fail over		*	*
Graphical command centre	*	*	*
GUI journal management	*	*	*
Right click resynch on GUI		*	*
Green screen menu	*	*	*
Patrolmax monitoring		*	*
Property file		*	*
Auditing tool		*	*
ASP & IASP support	*	*	*
Standard tool set	*	*	*
Advanced tool set		*	*

Maxava HA is implemented by certified technicians and can be delivered remotely or with on-site support as required.
